DETAILED ACTION

This Office action is in response to applicant's amendment filed on 8/25/2009.

Claims 3-7 and 9-10 are pending.

Claims 1-2, 8 and 11-13 have been cancelled.

Drawings

The drawings were received on 8/25/2009. These drawings are acknowledged.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "20" has been used to designate both shear reinforcing bars and main reinforcing bars. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-7 and 9-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Pat. No. 7,357,084 to Wu et al.

Claims 3-7 and 9-10:

Wu et al. disclose in Figs. 6-10, a prestressed composite girder, comprising: shear reinforcing bars 4 and main reinforcing bars 5 arranged across the prestressed composite girder; sheaths (Fig. 6) adapted to contain steel wires arranged across the prestressed composite girder; sole plates 6 placed at ends of the prestressed composite girder and provided with shear connecting members; and steel plates 14/15 placed in upper and lower flanges of the prestressed composite girder and provided with shear connecting members; wherein the steel plates 14/15 placed in the upper and lower flanges are embedded across an entire length of the prestressed composite girder. Wu et al. disclose the basic structures for the prestressed composite girder as stated but do not explicitly disclose wherein, for a simple bridge, the steel plates 14/15 placed in the upper and lower flanges are embedded across an entire length of the prestressed composite girder except ranges extending from both ends of the prestressed composite girder by about 10-15% or 20% of a negative or positive span. It would have been obvious to one of ordinary skill in the art at the time the invention was made to rearrange the steel plates in desirable locations in the girder in order to produce span ratio, e.g. negative or positive moment, since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70.

Response to Arguments

Applicant's arguments with respect to claims 3-7 and 9-10 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
